2018-IPR-I5-FGIII-010765	FG III - IT Project Assistant – Information Technology

Position for: **FGIII – IT Project Assistant**	As the science and knowledge service of the Commission, the mission of DG Joint Research Centre is to support EU policies with independent evidence throughout the whole policy cycle. The JRC is located in 5 Member States (Belgium, Germany, Italy, the Netherlands and Spain). Further information is available at: https://ec.europa.eu/jrc/ The mission of the Advanced computing and ICT support Unit at the JRC is: - to act as a centre of ICT competence supporting the operational activities of the JRC; - to implement the JRC ICT policy and to provide a reliable, efficient and secure ICT infrastructure for the whole JRC in line with the Commission ICT strategy; - to support and coordinate the implementation of corporate information systems. We are looking for an IT Project Assistant that will contribute to the implementation, management and follow-up of IT-projects in a dynamic environment. S/he will be required to: - analyse, develop, test, document, support and maintain new and legacy information systems, in close cooperation with business owners and representatives, system architects and support staff; - perform feasibility studies; - manage integration of information systems into the business environment; - provide technical guidance to project staff and to assist operational staff during the deployment and operation of information systems; - analyse and evaluate organisation, working procedures, working methods and business processes; - assist in the management of sub-contracted activities; - ensure the security of IT systems. Qualifications: Candidates must have: • a completed university education of at least three years and at least 5 years of relevant professional experience; • a thorough knowledge of the software development lifecycle, from requirement analysis to deployment and maintenance; • experience and knowledge of working with Java Enterprise Edition and Web technologies; • understanding of agile project management methodologies; • knowledge of Structured Query Language (SQL); • a thorough knowledge of English both written and spoken (min. level B2); • proven interpersonal, organisational and problem solving abilities and the ability to work both

	independently and as part of a team.
	Advantageous:
	• experience developing with the Spring Framework;
	• knowledge of Java build and dependency management tools (e.g. Maven) and Java application servers (i.e. Weblogic, Tomcat).
	• knowledge of secure development tools and techniques;
	• knowledge of automated testing and CI/CD tools;
	• experience in data modelling and knowledge of Oracle RDBMS;
	• experience developing with CMS tools (e.g. Drupal).
	The selection board will appreciate candidates showing enthusiasm and team spirit, willing to learn new domains and to address new challenges in a dynamic and multi-cultural environment.
