**FG IV - SCIENTIFIC PROJECT OFFICER -
CLIMATE CHANGE TRANSBOUNDARY
EFFECTS ON EUROPE**

<p>Position for:</p> <p>FGIV - Project Officer – Scientific Technical Office</p>	<p>As the science and knowledge service of the Commission, the mission of DG Joint Research Centre is to support EU policies with independent evidence throughout the whole policy cycle.</p> <p>The JRC is located in 5 Member States (Belgium, Germany, Italy, the Netherlands and Spain). Further information is available at: https://ec.europa.eu/jrc/</p> <p>The Economics of Climate Change, Energy and Transport Unit conducts economic analysis of climate, energy and transport policies, both at the EU and global levels, using different databases and expertise with in-house economic models and econometric tools.</p> <p>The ECCET unit offers a position for a researcher to contribute to the European climate risk assessment. The main objective of this project is to assess the impacts of climate change in and outside Europe on the EU. The research underpins climate policy actions under the European Green Deal, EU Adaptation Strategy and Paris Climate Agreement. The analysis integrates JRC and international climate, biophysical and socioeconomic modelling to assess a wide range of impacts of climate change: on people, ecosystems, human assets and economic sectors.</p> <p>The primary duties of the successful candidate involve:</p> <ul style="list-style-type: none">• Advance the understanding of global climate impacts with potential spill-over effects on the EU using state-of-the-art global climate hazard and climate-impact databases;• Manipulate, interrogate, analyse, visualise, and interpret data on key global biophysical and direct socioeconomic impacts;• Develop probabilistic scenarios of climate impacts tailored for integrated economic modelling to assess transboundary effects on EU;• Translate scientific output in peer-reviewed publications and policy summaries. <p>Qualifications:</p> <p>Required qualifications:</p> <ul style="list-style-type: none">• Candidates should have a degree in a relevant subject (earth, ocean or atmospheric sciences, data science, engineering, statistics, economics) together with a minimum of 5 years of relevant experience or a Ph.D.• Experience with handling large spatiotemporal datasets, statistical and data analysis techniques is required.• Modelling skills: Candidates should have ease in manipulating quantitative information and datasets. Knowledge of programming software and languages (such as Python, R) is an important asset and will be highly valued.• Scientific record: The successful applicant is expected to have an excellent record of research activities including publications in
