- Draghi

Circular Economy Act – EC jan '25

Circular Economy Act – three possible pillars

- Reform **End of Waste** and **by-product** criteria
- Harmonise, digitalise and expand selected **Extended Producer Responsibility** schemes
- Targeted, impactful and implementable **public procurement** criteria for EU circularity
- **Recycled content** in selected products
- Improve **bio-waste** collection and use, and **phosphorus** valorisation from sewage sludge
- Enhance **separate collection**, and **reduce landfilling**, including through economic instruments

- Improve the circularity of **scrap metals**
- **Industrial policy measures** (e.g. circular economy business models, emerging recycling technologies)
- Harmonise **environmental tax** bases
- Harmonise requirements for **extractive waste management** and **critical raw materials recovery**
- Possible targeted updates of the **List of**

Horizontal approach

Reduce administrative burdens, minimise reporting obligations, digitalise and simplify, including repeal legislation where appropriate

- Create market demand for secondary critical raw materials through **recovery and recycled content**
- Extend scope to **green and digital transition** equipment and align with eco-design rules
- Harmonise and digitalise **Extended Producer Responsibility** schemes
- Make **collection** methodology and targets fit for purpose
- Harmonise **treatment standards** for better recycling
